

INTRODUCTION

Forging is in a transition from black smithy to modern technology led manufacturing. Forging finds its use in various industries and has several applications using different metals and alloys. Forging cannot be substituted due to its strength properties. Since Forging is energy and cost intensive process it is important to understand the basics and modern methods to make forging a very competitive technology.

This program covers the basics of forging technology to modern manufacturing , engineering and quality aspects and modern concepts of CAE and IOT also will be dealt with as the new generation forging is about complex shapes , complex practices which eventually make forging competitive.

Indian forging Industry is fragmented into the top 5 companies which are technology led and the rest which are not at par with world class practices. This program shall be an eve opener for many agencies and associates of forging products and technology.

Keeping this in view, IMTMA is organizing an online training on "**Hot Forging Technology-Processes, DFM, Quality and Cost considerations**".

Special Offer: Participants will be provided **FREE ACCESS** to **IMTMA Elearning** course on "[Heat Treatment](#)" towards continual learning and up skilling. Access will be valid from 07 Dec to 16 Dec 2021.

FOCUS AREAS

- Application of forging
- Metallurgy of forging
- Different Hot forging processes and equipment
- Design considerations
- Quality considerations
- Cost considerations
- Modern configurations and technologies
- Use of CAE and Digitisation (IOT) tools to reduce waste of all kind
- Automation and robotics
- Light weighting concepts

KEY TAKE AWAYS

After undergoing the programme, the participants will be able to -

- Understanding the basics of hot forging technology
- Understanding various manufacturing methods and classification and their practical applications
- Understanding the challenges of industry in the emerging disruptive environment
- Understanding the selection of right equipment, processes and practices to be globally competitive.

FEE PER PARTICIPANT (PER LOGIN)

Rs. 4500/-
+18% GST
**IMTMA Members/ Micro Companies/ Individuals/
Educational Institutions / Students/ IMTMA Non
Members/ Others**

USD 180/-
Overseas Participants

Group Concession : 20% for 3 to 5 and 30% for 6 and more delegates being nominated from the same company

PARTICIPANT PROFILE

- Top and middle management of forging companies
- Marketing and purchasing functions of Forgers, auto part manufacturers using forgings
- Buyers and engineers of OEM.
- Researchers and faculties and students of educational institutes.

FACULTY

This programme will be conducted by **Dr. Vasant Khisty**

Dr. Vasant Khisty is a technologist with expertise in Forging Technology and drive line systems. He has more than 37 years’ experience in manufacturing and application of forgings. He has done his research on global competitiveness of auto component industry and his contribution to auto and construction equipment’s is immense. He has been associated with IMTMA as a trainer and has conducted training all over India.
