

INTRODUCTION

Investment in capital equipment often runs into high value with long sales cycles covering various aspects of equipment. Selling of capital equipment purely on the basis of technical expertise alone, may not be sufficient. Often during the procurement of a Capital equipment, there are a number of stakeholders which include the technical buyer as well as the economic buyer. Sometimes a committee could be formed for evaluating different offers from both technical as well as economic point of view. Beyond the price comparisons, commercial aspects come into play where offers are often evaluated on technology, warranty, LD, spares, Installation, commissioning schedule, bank guarantees and more. Hence the sales and marketing professional must have thorough understanding of all the commercial aspects to effectively win business.

Keeping this in mind, IMTMA is conducting a detailed program on Commercial aspects for Sales and marketing engineers, as part of the 6-day online training program on Effective Sales and Marketing of Machine Tools and Accessories on 23 - 28 May from 0940 to 1300 hours each day.

On 27 May 2022, you may attend Module 5: Commercial Aspects for Sales and Marketing Engineers.
