

INTRODUCTION

CNC Machining Centres form the core of manufacturing operations right from producing auto parts to machine critical aero space components. Its effective application can ensure increased productivity, highest accuracy, rigidity and improved surface finish. A range of components can be consistently manufactured to very close tolerances, leading to improved quality; efficient production process; reduced costs and bare minimum cycle times. In modern CNC machine shops, every second counts and the CNC programme drives the machine efficiency and productivity. Many a times, the CNC programme contains lot of idle movements (air cutting) and is not optimized for minimum cycle time. Enhanced knowledge on CNC programming and its control features are now very critical to keep the cost per component to the minimum.

FOCUS AREAS

- Optimization of programming for various Machining Centre operations
- Programming using macros & variables
- Demo in CNC VMC; usage of customized programmes
- Advanced programming concepts - polar co-ordinates, Scaling, Mirror & Rotation
- Introduction to CAM programming; applications & advantages
- Demo of milling applications & Programming exercises in CADEM
- Simulation using CNC Simulators
- Real time machining in CNC Machining Centre

KEY TAKE AWAYS

After undergoing the programme, the participants will be able to -

- 1.Reduce cycle time thro optimization of Programming
- 2.Learn Programming using Macros and Variables
- 3.Understand advanced Programming concepts including Scaling, Mirror, Polar Co-ordinates etc.
- 4.Go thro’ Hands-On / Demo Of advanced Programming concepts in CNC VMC.

PARTICIPATION FEE

Rs. 13500/-
+18% GST

**IMTMA Members/ Micro Companies/ Individuals/
Educational Institutions / Students/ IMTMA Non
Members/ Others**

USD 540/-
Overseas Participants

Group Concession : 10% for 3 to 5 and 20% for 6 and more delegates being nominated from the same company

PARTICIPANT PROFILE

This programme will benefit Managers, Engineers, Supervisors, CNC Programmers & others involved in the functions of Production, Manufacturing Servicing and other related functions from Machine Tool, Automobile and Auto ancillaries, Tool rooms, Aerospace, Defence & Railway establishments, General Engg. and other manufacturing industries. This will be an advanced level training programme. Knowledge about Basic CNC Programming and Operation will be a pre requisite for participants.

FACULTY

This programme will be conducted by industry experts from IMTMA Technology Centre.
