

INTRODUCTION

In today’s competitive Business Scenario, organizations that excel in their performance consistently survive. In order to have a sustainable business organization, one needs to develop systems that align with the goals of the organization to all functions. And all the functions should perform as per standard on a daily basis consistently. To perform daily, we need a structured approach that needs to be practiced everyday.

Lean daily management system is a systematic approach to plan, perform, track and solve problems on a daily basis. The system also ensures predicting problems so that they are appropriately solved at the right time to ensure effective performance.

Keeping this in view, Indian Machine Tool Manufacturers' Association (IMTMA) is organizing an online programme on “Lean daily work management system”.
