

INTRODUCTION

Hydraulics is one of the popular technology applied in many machinery and equipment as it has significant advantages over other technologies as a prime mover. Since it is involved with many elements for collective output, it is mandatory to know in depth about industrial Hydraulics.

FOCUS AREAS

- Pretest
- What is the braking system?
- Who decides the speed of the vehicle?
- Study types of braking systems .
- Mechanical braking ,Hydraulics braking , CBS or ABS system basics
- Mechanical Lever and its applications
- Hydraulic Lever and its application
- Shoe brakes and Disc brake system
- Friction types and application ,merits and demerits
- Front wheel and Rear wheel disc brakes mechanism
- Basics of Hydraulics system Pascal Law, cylinder Area ,Load , Pressure ,Flow Units , force units and calculation
- Hydraulic system control valves, Delay vale, Pressure control valve, fluid reservoir, Brake fluid pipes , fittings
- Brake fluid types , properties , Air bleeding
- working principle of each system its merits and Demerits
- ABS system and CBC system Sensors , Proportional valve, ABS ECU
- Types of Brake system for two wheeler and four wheeler
- Post test , discussions , Question Answer

KEY TAKE AWAYS

- Participates understands importance of vehicle Braking system
- Understand two wheeler and fiur wheeler braking types ,construction, components and its working
- Enhance know haw of braking system manufacture quality parts
- Takes care while assembly of braking system understanding end result
- Assembly of proper sensors its wiring , pneumatic, hydraulic piping
- Enhance assembly quality and easy for trouble shooting

PARTICIPATION FEE

Rs. 6000/-
+18% GST

**IMTMA Members/ Micro Companies/ Individuals/
Educational Institutions / Students/ IMTMA Non
Members/ Others**

USD 240/-
Overseas Participants

Group Concession : 10% for 3 to 5 and 20% for 6 and more delegates being nominated from the same company

FACULTY

This program shall be conducted by Mr. Deshpande

Mr. Deshpande is a Domain expert with more than 38 years of hands-on experience in machine controls design, assembly, & commissioning. He is an expert in hydraulics, pneumatics, bearings lubrication & mechatronics (focus on factory automation). He has vast experience in circuit building, system designing, commissioning & fault finding. He has delivered extensive hands-on training in hydraulics and pneumatics to more than 2000 industry professionals across India. He represented India as Mechatronics trainer & expert of Mechatronics World Skills international Competition 2013 & Jury for Russian hi-tech World Skill competition 2014.

For Registration Contact

Santosh Singh
