

INTRODUCTION

Set of Stamping Dies or Press Tools forms a vital, costly and time consuming element in the entire sheet part manufacturing process chain. Die Design defines the product quality, operating economics and productivity of mass manufacturing organization. Not only Stamping Die Design is being inadequately covered in most academic curricula; the coverage is too simplistic, academic and focused on specific CAD tool, making it largely a desktop event. It is generally not possible to cover the practical industrial part complexity, desired quality level and performance requirements.

Keeping this in view, IMTMA is organising five days online training on Design of stamping dies for sheet metal parts.

FOCUS AREAS

- Formability properties of sheets
- Defects and their acceptance standards
- Die Designer Inputs from Presses and Press Lines
- Sheet Metal Component Production Method Plan & Constraints
- Type of Dies for various operations
- Component / Elements which go in a Die –
- Die Design Standards
- Die Design Process
- **Virtual run-through of design process for various types of dies for a sample part**

KEY TAKE AWAYS

- **Session on Simulation**
- Holistic end to end view of total Die Design process chain
- Know the required design inputs
- Know the constraints and performance requirement
- Know the defects and design refinement loop
- Get an idea of Die manufacturing process and DFM for Dies
- Know how the Dies are checked

FEE PER PARTICIPANT (PER LOGIN)

Rs. 12500/-
+18% GST
**IMTMA Members/ Micro Companies/ Individuals/
Educational Institutions / Students/ IMTMA Non
Members/ Others**

USD 500/-
Overseas Participants

Group Concession : 10% for 3 to 5 and 30% for 6 and more delegates being nominated from the same company

FACULTY

This program will be conducted by **Mr. Pravin Deore** and **Mr. Avinash Khare**.

Mr. Pravin Deore has completed his MS from Warwik University, UK. He has more than 23 years of experience in press tool industry, which includes 17 years in press tool design and rest is in manufacturing & try-out. He has worked with Mahindra & Mahindra for 13 years at the position of Deputy Manager Design. At Godrej Tooling, he is working as Head of Press Tool Engineering. During his tenure of 9 years, Godrej Tooling has successfully included HSS parts & Skin parts into their portfolio

Mr.Avinash Khare, IMTMA
Mr. Avinash Khare is presently working as a Consultant Head for IMTMA Pune Technology Centre for last 5 years; he has been designing, developing content and delivering wide range of Training Courses as a Faculty. He is Electrical Engineer by Qualification and he has worked for over 33 years at Tata Motors Pune in various capacities ranging from R&D in Industrial Electronics, Machine Maintenance, Technology Procurement, Head of Machine Shops, Tool Room Shop Head, Head of Die Design and Champion in Business Excellence. He has taught Instrumentation and Bio Medical Instrumentation at Pune University as part time faculty.
