Manufacturing Technology Training
An IMTMA initiative

ASME Certified - PD: 694 –Training on Geometric Dimensioning and Tolerancing in Design thru Manufacturing (for GDTP-Technologist Level)
Date : 22 to 26 April, 2024
Time : 0900 Hrs to 1330 Hrs (Online Mode)

INTRODUCTION

Geometric Dimensioning and Tolerancing (GD&T) system eliminates ambiguities in engineering drawings and brings out the designer's intent very clearly. It ensures seamless communication between design, engineering, manufacturing and quality teams across the entire organization enabling them to work in a concurrent engineering environment. In the competitive industrial scenario prevailing today, proper application of the GD&T system helps the companies to reduce manufacturing and inspection costs.

BUILD YOUR GD&T EXPERTISE DIRECT FROM THE SOURCE!

DO YOU KNOW?

The American Society of Mechanical Engineers (ASME) is the Most Respected Provider of GD&T Training and Development Courses, World-Famous "Geometric Dimensioning & Tolerancing Professional (GDTP) Certification; Plus Handbooks and GD&T codes for Engineering Professionals!

The Indian Machine Tools Manufacturers' Association (IMTMA) has a State of Art Training Facility Equipped with World Class Machining and Measurement System Lab best suited to facilitate the Hands-On Practical Training on GD&T. **IMTMA is an Authorised Training Provider (ATP) Of ASME, Certified for providing IACET Accredited ASME training courses on ASME Y14.5 standard to Engineering Professionals across India.**

Keeping this in view, Indian Machine Tool Manufacturers' Association (IMTMA) is organizing a programme on **" ASME Certified - PD: 694 –Training on Geometric Dimensioning and Tolerancing in Design thru Manufacturing (for GDTP-Technologist Level)".**

FOCUS AREAS

Introduction to GD&T

- Fundamental Dimensioning Rules
- Coordinate Tolerancing and Its Shortcomings
- Geometric Tolerancing and Its Benefits
- Typical Measurement Equipment Used

GD&T Terms, Symbols, Rules, and Concepts

- Dimension Types
- GD&T Symbology FCF, Modifiers and Symbols
- Feature and Feature of Size
- Material Conditions MMC, LMC, RFS
- Variation Types on a Feature
- Difference Between Regular and Irregular Features of Size
- Virtual Condition
- Statistical Tolerancing
- Continuous Feature Symbol for Multiple Features of Sizes

Datums

- Importance of Datums
- Restraining Degrees of Freedom with Datums
- Datum Application to Features and Features of Size.
- Use of Datum Targets
- Datum Shift - Material Conditions Applied to Datums

Form Tolerances

- Tolerances Fatness, Straightness, Circularity, Cylindricity
- Form Tolerance Applications
- Inspecting Flatness

Orientation Tolerances

- Orientation Tolerances – Angularity, Parallelism, Perpendicularity
- Implied Right Angles, Degrees Basic Angle, Tolerance Linear Units
- Application of Orientation Tolerances
- Inspecting Orientation Tolerances

Profile Tolerance

- Profile Tolerance and Its Applications
- Inspecting Profile Tolerances
- Composite Profile
- Profile for Co-planar Surfaces

Location Tolerances

- Location Tolerances Position, Symmetry, Concentricity
- Application of Position Tolerance Feature Control Frame
- Size and Shape of Tolerance Zone
- Position Tolerance Measurement Methods - Functional Gage, CMM Data
- Zero Tolerancing at MMC

Composite Position Tolerance

- Basic Concept and Characteristics
- Various Interpretations of Composite Position Tolerance

Runout Tolerances

- Basic Concepts and Characteristics of Circular and Total Runout

GDTP Certification - Technologist Level:

Preparation for Technologist Geometric Dimensioning and Tolerancing Professional (GDTP) Certification, achieved by passing a computer-based, multiple choice examination, provides an objective measure of an individual's ability to understand drawings which have been prepared using the language of Geometric Dimensioning and Tolerancing (GD&T), as defined in the ASME Y14.5 Standard.

KEY TAKE AWAYS

At the end of the course, participants will be able to understand -

- Importance of applying correct GD&T on drawings
- Important GD&T terms and definitions
- **Relationship of geometric characteristics and feature types such as RFS, MMC, and LMC conditions and calculate bonus tolerance**
- Inspection of GD&T features using conventional, CMM's & Functional gauges
- **Application of GD&T controls for new product development using case studies**
- ASME Y14.5M standard codebook for practice
- **Preparation for ASME Certification**
- **Complimentary ASME membership for non-member participants**

FEE PER PARTICIPANT (PER LOGIN)

Rs. 20000/-
+18% GST
IMTMA Members/ Micro Companies/ Individuals/ Educational Institutions / Students/ IMTMA Non Members/ Others

USD 800/-
Overseas Participants

Group Concession : 10% for 3 to 5 and 30% for 6 and more delegates being nominated from the same company

PARTICIPANT PROFILE

The course is suited for beginners as well as experienced professionals with no prior OR minimal GD&T experience, who are looking to get in-depth knowledge and grip on best practices in GD&T and the ASMEY14.5M-2009 standard OR are aiming for **ASME GDTP Technologist Certification**.

At the end of this course, the participants will also attempt a mock test based on the **ASME GDTP - "Body of Knowledge"** Guide to prepare individuals for the ASME GDTP-Technologist certification exam. The Answer Key will also be provided to all participants after completion of the Mock test, for self-evaluation.

FACULTY

This program will be conducted by **Mr. M. Krishnamoorthy**

Mr. Krishnamoorthy, is former Senior Director of IMTMA Technology Centre and an authorized training instructor with ASME, NY for delivering accredited ASME GD&T Trainings. He has undergone advanced training in GD&T from ASME in Seattle, USA. He is a certified ASME GDTP Senior Professional after successful completion of Senior Level GDTP certification examination by ASME, USA.

For over 38 years of his continued engineering practice in the industry, he has acquired astute expertise in the application and use of GD&T principles in CAD/CAM, high precision CNC machining as well as conducting Technical Training. He has imparted specialized training in GD&T for more than 1000 engineers across manufacturing companies in India and assisted them in implementing GD&T in design through manufacturing.

He is a postgraduate in Production Engineering from PSG College of Technology, Coimbatore. Prior to working at IMTMA, Mr Krishnamoorthy has worked at ISRO Satellite Centre, Bangalore in the field of Precision Machining of the satellite on-board components. After ISRO, he was with Perfect Moulds and UMS technologies as a specialist in Tool Planning and Production and Technical Training in CAD/CAM/CAE, respectively.
