Manufacturing Technology Training
An IMTMA initiative

Best Practices in Supply Chain Management for Survival and Growth
Date : 5 September, 2025
Time : 0900 Hrs to 1730 Hrs (Online Mode)

INTRODUCTION

With the economic downturn the organizations will have to make all efforts to reduce cost and maintain satisfactory cash flow. In order to maintain satisfactory cash flow, it will be imperative that the Operations and Supply Chain functions will have to make all out efforts to optimize the inventories. The Supply Chain function of the future, therefore, will have to use the best practices. Those who will take the path of using the latest techniques and the technology have the best chance to survive and grow.

This program will provide you with these 'best in class' techniques in Supply Chain function. This workshop will be presented in 2 online sessions of about 3 hours each. During 1st session, a practical assignment will be given to the participants. In the next sessions, some of the participants will discuss the work done in their assignments and this will benefits the other participants.
