Manufacturing Technology Training
An IMTMA initiative

Welding Technology for Practicing Engineers
Date : 9 June, 2026
Venue : IMTMA Technology Centre, Bengaluru

INTRODUCTION

Joining two or more components is always one of the most important tasks. While hardware like nut-bolt is used for joints that need frequent or periodic dismantling processes like welding, brazing and soldering are used for permanent joining of parts. Welding is also used to build up a complicated component. The performance of the welded joint depends on

- Design of the welded joint
  - Type of welding
  - Joint design
  - Selection of proper electrodes / filler material
- Welding process
  - Like Manual Arc / TIG / MIG etc
  - Pre-heating and post heating
- Inspection process
  - Qualification of the process
  - Certification of the welder
  - NDT and other tests
  - Dimensional accuracy

The equipment designer needs to consider many parameters while designing.

Keeping this in view, Indian Machine Tool Manufacturers' Association is organizing a training on **Welding Technology for Practicing Engineers.**

FOCUS AREAS

- Introduction to the Welding Technology
- Brief History
- Classification of Welding
- Arc Welding
- Gas Welding
- Flame Characteristics
- Weld Design
- Weld Symbols
- Weld Process Specifications
- Weld Testing
- Weld Defects
- Welding Techniques
- Welding of Dissimilar Metals
- Welding Safety

KEY TAKE AWAYS

- Develop a **fundamental understanding of welding technologies, processes, and industrial applications**.
- Gain the ability to **interpret weld symbols, weld designs, and basic welding process specifications** used in engineering drawings.
- Understand **weld quality aspects including common defects, testing methods, and inspection practices**.
- Learn **welding techniques, safety practices, and key considerations in welding different materials**.

PARTICIPATION FEE

Rs. 2999/-	Rs. 1500/-	Rs. 999/-	USD 120/-
+18% GST	+18% GST	+18% GST	
IMTMA Members/ Micro Companies/ Individuals/ IMTMA Non Members/ Others	**Professors**	**Student**	**Overseas Participants**

Group Concession : 10% for 3 to 5 and 20% for 6 and more delegates being nominated from the same company

PARTICIPANT PROFILE

- This workshop is for Engineers from departments like Design, Development, R & D, and New Product Development.
- This interactive workshop will help the practicing engineers get a detailed insight in the various aspects of welding process, weld design and how to design the machine components where welding is involved.
- Senior and middle level managers and specially Product Development Managers can benefit from understanding the welding process and its applications.
- This program is useful for fresh engineers in Quality, Erection and Commissioning and servicing departments.

FACULTY

This program will be conducted by **Mr. D B Kulkarni.**

Mr. D B Kulkarni has 30+ years' experience on Design and Development of machine design in the industries like M/s KEC, Bengaluru, M/s CGL and 11 years as Corporate Trainer and Consultant.

REGISTRATION : Prior registration for participation is necessary. Number of participants is limited and will be accepted on 'First Come First Serve' basis. A Certificate of participation will be issued to participants.
Important Information : Participation fee includes, course material, working lunch and tea / coffee. Interested companies are requested to register online by clicking on 'REGISTER' button and by filling up the nomination authority and participant's details in specified form.
