Manufacturing Technology Training
An IMTMA initiative

Hands-on training in PLC Programming and Networking
Date : 16 to 18 June, 2026
Venue : IMTMA Technology Centre, Bengaluru

INTRODUCTION

In today's industrial landscape, Programmable Logic controller (PLC) serve as the cornerstone of automation, enabling precise control over machinery and processes. PLC represents a key driver in automation, production & process planning in the manufacturing industry. Many industries of today, including packaging, pharmaceuticals, refineries, mines, machine shops, power plants and food industries use PLC systems for automation of their machinery to produce more, consistently, quickly and efficiently.

Modern PLC systems can be connected to data networks and interfaced with other automation control devices. However, for improvement / modification of the automation system, correct interpretation of the Logics and changes need to be made to the PLC program as and when required.

Keeping this in view, Indian Machine Tool Manufacturers' Association is organizing a 3-day **Hands-on training program in PLC Programming & Networking.** This training is designed to equip participants with practical skills in both PLC programming and networking, crucial for optimizing operational efficiency and troubleshooting in industrial settings.

Note: The training will include hands-on sessions using Mitsubishi PLC systems.

FOCUS AREAS

- Basics of Digital Electronics & Relay Logics
- Architecture of PLC
- Concept and clear understanding of Scan Cycles in working of PLC
- Overview of commonly used Hardware (DI/DO and AI/AO Modules)
- Discrete Input / Output modules, interfacing with field devices, concept of Sourcing & Sinking, NPN, PNP, I/O addressing.
- Role of sensors in facilitating industrial automation.
- Overview of PLC Programming Techniques
- Creating & Editing Ladder Logic Program
- Hands-on practice in simulators
- Overview of Communication and Networking.
- Industrial Networking: Device level and Control level
- HMI Basics & Features
- HMI Screen Building
- Integrating Sensors, PLC and HMI by networking
- Live Examples of working on PLC and HMI with sensors.
- Hands-on practice

KEY TAKE AWAYS

After undergoing the programme, the participants will be able to learn -

- Basics of PLC technology and understand the concept of Ladder programming.
- Basics of HMI and creating some screens.
- Simulation of HMI and PLC codes.
- Importance & types of Sensors and Peripherals.
- Integrating the Sensors, PLC and HMI.
- Networking: introduction of RS485 based network and Industrial Ethernet based network .
- Knowledge about various application possibilities using PLCs and HMIs.
- Hands on experience of the PLC and HMI usage so as to get a feel of Industrial automation and networking.

PARTICIPATION FEE

Rs. 6999/-	Rs. 3500/-	Rs. 999/-	USD 280/-
+18% GST	+18% GST	+18% GST	**Overseas Participants**
IMTMA Members/ Micro Companies/ Individuals/ Educational Institutions / Students/ IMTMA Non Members/ Others		**Student**	

Group Concession : 10% for 3 to 5 and 20% for 6 and more delegates being nominated from the same company

PARTICIPANT PROFILE

This programme will benefit Managers, Engineers & Middle management personnel involved in the functions of Design & Development, R&D, Production, Process planning, Application Engg. Maintenance and other related areas from Machine Tool, Auto & Auto Ancillaries, Packaging, Pharmaceuticals, Food Processing and other General Engineering industries.

Faculties from educational institutes can also participate in the programme. Students who are interested in Industrial Automation can participate to get a hands-on feel.

The programme will be totally practical oriented with hands-on practice. Participants would be encouraged to raise questions and solicit feedback from the expert faculty.

FACULTY

This programme will be conducted by, IMTMA Subject Matter Expert.

She is a unique blend of industry expertise and academic experience. She holds a degree in Electronics and Communication Engineering from Mangalore University and a Master's in Industrial Electronics with VTU Gold Medal. With over 15+ years of experience in leading companies such as Microview Software Technologies, L&T Emsys and Intel Inc, and Distinct Productivity Solutions, she has developed deep technical and industrial expertise. In addition, she has spent a decade in academia, teaching Electronics and Electrical engineering subjects and training professionals in Industrial Automation.

She earned her Doctorate from VTU in 2021, with a research focus on Industry 4.0. Her doctoral work involved developing an Internet gateway for monitoring machine shop activities-leveraging M2M communication, data analytics, and digital solutions to address modern manufacturing challenges. Her research contributions have been published in reputed international journals including Taylor & Francis, Springer, and IEEE.

Driven by a strong passion for teaching, skilling, and knowledge transfer, She has trained numerous industry and corporate professionals in Industrial Automation and Digitalization.

She currently heads the Automation Division at Distinct Productivity Solutions Pvt. Ltd., Bangalore.
