**Last date for registration 17 September 2026**

## INTRODUCTION

**Stay Ahead of the Changes to ISO 14001 !!**

**Why ISO 14001 is being revised and what is driving the update**

- **The most important changes in ISO 14001:2026**
- **How revised requirements may impact certified organizations**
- **What transition periods and migration options are likely to be available**
- **What to expect during future certification and surveillance audits**
- **Practical considerations for preparing your organization for the transition**

**Environment** is everything that is around us. It can be living or non-living things. It is surroundings or conditions in which a person, animal, or plant lives or operates.

It is the surrounding in which an organization operates, including Air, Water, Land, **Biodiversity, climate change**, Natural Resources, Flora, Fauna, Humans & their interrelations.

**What is EMS (Environmental Management System)?**

The System established by the management to develop & implement its environment policy & manage its activities or products or services that can interact with environment.

Environmental Management system standards provide the organization with an international, state-of-the-art **model** to follow.

As per ISO, Audit is a systematic, independent and documented process for obtaining objective evidence and evaluating it objectively to determine the extent to which the audit criteria are fulfilled.
